

HTML and CSS quick reference

HTML and CSS: Build Your First Web Page

Inkwell

Page skeleton

`<!DOCTYPE html>` then `<html lang="en">`
containing `<head>` (title, meta, styles) and `<body>`
(visible content).

Common elements

Element	Use
<code><h1></code> to <code><h6></code>	Headings, one h1 per page
<code><p></code>	Paragraph
<code></code>	Link
<code></code>	Image with description
<code></code> , <code></code> , <code></code>	Bulleted, numbered lists and items
<code><header></code> , <code><nav></code> , <code><main></code> , <code><footer></code>	Page regions
<code><section></code> , <code><article></code>	Groups of related content
<code><form></code> , <code><label></code> , <code><input></code>	Forms and fields

Accessibility checklist

- ☐ Headings in order
- ☐ Alt text on every image
- ☐ Descriptive link text
- ☐ Labels on every form field
- ☐ Strong colour contrast

CSS rule

`selector { property: value; }`

Selectors

Selector	Matches
<code>p</code>	Every paragraph
<code>.note</code>	Elements with class="note"
<code>#menu</code>	The element with id="menu"
<code>nav a</code>	Links inside nav
<code>a:hover</code>	A link under the pointer

Useful properties

Property	Example
color	<code>color: #1f3a5f;</code>
font-size	<code>font-size: 1.2rem;</code>
margin, padding	<code>padding: 8px 16px;</code>
border	<code>border: 1px solid #ccc;</code>
display	<code>display: flex;</code>

Three ways to add CSS

External: `<link rel="stylesheet" href="site.css">`

Internal: `<style>...</style>` in the head

Inline: `style="color: red"` on one element

Responsive basics

`<meta name="viewport" content="width=device-width, initial-scale=1">`

`@media (max-width: 600px) { ... }`
