

# UJWAL CHHETRI

Backend Developer & ML Enthusiast

Patichour, Parbat, Nepal | 9762550034 | chhetriujwal94@gmail.com | LinkedIn: [linkedin.com/in/ujwal-chhetri-6b47a230b](https://www.linkedin.com/in/ujwal-chhetri-6b47a230b)

## PROFILE SUMMARY

Eager and adaptable IT undergraduate with hands-on experience across full-stack web development and applied data science. Comfortable taking classroom theory into real, working software — from live backend features to trained ML models — and collaborating closely with teams to get there.

## EDUCATION

### Bachelor's Degree in Information Technology (In Progress) — Infomax College of IT and Management

Building technical foundations and a problem-solving mindset through project-based coursework — turning classroom theory into things that can actually be built.

## TECHNICAL SKILLS

| Backend             | Frontend                     | Programming Languages | Data Science           |
|---------------------|------------------------------|-----------------------|------------------------|
| Django, Spring Boot | React, HTML, CSS, JavaScript | Python, Java, C#      | PyTorch, Pandas, NumPy |

## LANGUAGE PROFICIENCY

Nepali (Native) | English (Fluent)

## PROJECTS

### Hall Booking System

A web application for reserving and managing event halls — handling availability checks, booking requests, and admin approval in one place. Built with Django on the backend and a React front end.

### Restaurant Management System

A platform for managing restaurant operations, including menu management, order tracking, and table/reservation handling. Built with Django on the backend and a React front end.

### Educational Platform (Udemy-style)

An online learning platform where instructors can publish courses and students can browse, enroll in, and track progress through them. Built with Django on the backend and a React front end.

## WORK EXPERIENCE

### Part-Time Django Developer — Arambha IT Solution, Pokhara

- Contributed to backend features on live, production projects.
- Wrote and maintained core application logic supporting smooth day-to-day operation of the platform.

## SOFT SKILLS

- Teamwork — coordinated with teammates on a shared Django codebase, dividing tasks and meeting deadlines without overlapping work.
- Adaptability — gained through data science work, switching approaches quickly when a dataset was messy or a model wasn't converging.
- Communication — sharpened by presenting project work clearly to instructors and teammates, translating technical decisions into plain language.

## ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

- Winner, school-level quiz competition.
- Volunteer, Red Cross.
- Member, school Interact Club.

Certifications:

- Django for Everyone Specialization — Coursera, 2025
- Machine Learning Specialization — Coursera, 2026
- Deep Learning Specialization — Coursera, 2026
